PROFILE

Mexican Frontend Developer with experience, fluent in German and English with a passion for creating beautiful and user-friendly web experiences. Skilled in the MERN stack and modern web technologies. Seeking new career opportunities to work on exciting projects with like-minded professionals and further advance my professional development.

EMPLOYMENT HISTORY

Fullstack Developer, Southern Star MGA

CDMX

Dec 2023 — Present

- Redesigned the architecture of a React frontend and Node.js backend for a trucking insurance company, optimizing scalability and maintainability.
- Replaced the legacy operations and financial management system with a new, end-to-end custom solution built from scratch.
- Developed new features and user interfaces using React (JavaScript) and Node.js, enhancing system functionality.
- Created reusable notification templates to streamline the communication of important announcements.
- Designed and implemented dynamic documents, including policies, endorsements, driver maps, and other essential materials for agents, underwriters, clients, and developers.
- Built and scheduled Cron jobs to automate an emailing system using Firestore data in Firebase.
- Utilized Google Cloud Task queues to automate the retrying of failed requests, improving system reliability.
- Integrated advanced APIs with QuickBooks to accelerate and automate operational procedures in financial management.
- Automated IT support auditing processes using the 8x8 API, ensuring better monitoring and reporting.
- Collaborated effectively in English to communicate technical issues, solutions, and updates with teams and stakeholders.
